

**Volume and tick activity are extremely vital in markets that have momentum. The bid/ask Footprint® will clearly show not only price and volume, but also provide understanding about the direction of momentum, as well as, provide a way to gauge the oscillating strength of it.**

Using tick count or volume count charts to view the bid/ask Footprint® will provide even another layer of understanding for price runs.

Tracks volume with price to produce a multi-dimensional display for quicker identification of changes in the underlying market.

**Spot Pivot Points With Greater Accuracy** – The primary characteristic of the Footprint® is to provide greater detail of underlying market dynamics.

**Gain Confidence** – Follow and better understand order flow because you can see and quantify actual transacted volume and be left guessing.

Each Footprint combines price and volume to act as a thermometer of price strength and then alerting through color.

**Get On The Correct Side Of The Market** – Volume is crucial in determining price strength at every price level, but especially at potential support & resistance and other turning points in the market. The bid/ask Footprint® will provide the best possible way of gauging these point in a short term time frame.

The bid/ask Footprint® employs color at each price as a visual means of alerting you to changes in volume and order flow.

Shading each price allows for constant tracking as price moves directionally or sideways, providing an additional manner to confirm price activity and strength.

## BENEFITS

**Execute With Greater Precision** – Time your entries & exits with much greater precision

**Gain Confidence** – Follow and better understand order flow to the bid and ask

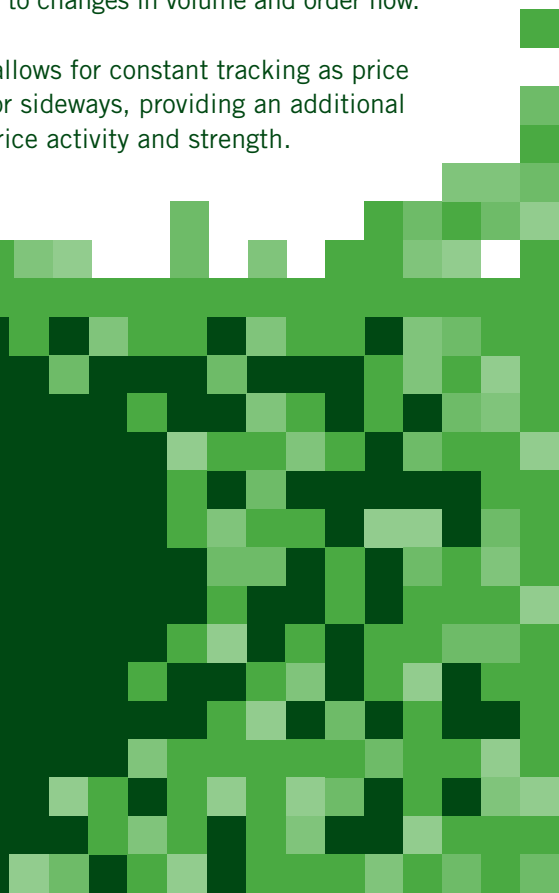

Each Footprint combines price and volume to act as a thermometer of price strength and then alerting through color

**Segment Volume By Each Price** – See INSIDE the price bar for clues to whether price is strengthening or weakening

See INSIDE the bar to spot where a majority of the volume is occurring

**Compliments Existing Methodologies** – Used to confirm other indicators and strategies by gauging supply/demand at key levels & points

Compliments Market Profile® by providing better timing of a trade

**Filters The Noise**

See INSIDE the price bar for clues to whether price is strengthening or weakening – as price trades, not after the fact.

When the markets are noisy, the bid/ask Footprint® will help to confirm this type of market activity by highlighting the lack of directional volume and order flow. Using the column delta at the bottom of a bar will show traders how forceful moves are.

There are various ways to view the Footprints®. Please refer to the other product information sheets or videos for ore information of specific Footprint® types.

**TECHNICAL SPECIFICATIONS**

Minimum System Requirements

- Windows 2000, Windows XP, Windows Vista
- Windows Updates are highly recommended
- 2 GHz Pentium processor (HT Technology or dual core highly recommended)
- 17" or larger Monitor with minimum 1024x768 resolution
- 1 GB RAM Recommended
- 100 MB available disk space
- Cable, DSL or higher Internet connectivity
- Microsoft Internet Explorer browser version 5.5 for downloading
